

Open Data Policy

This page contains data, statistics, reports & researches, which produced by the Ministry of Climate Change and Environment. This information is accessible in the form of open data that provides data to the user in easy to use formats, such as Excel.

The open data policy adopted by the Ministry allows you to use the files as long as you don't modify the data in these files. You also have to mention the source of data and make it accessible to others.

Usage :

It has used open data in absolute freedom :

- The ability to use, re-printer, copy & distribute the open data.
- The ability to modify the design.
- Mention the source of the data.
- Don't change the information in open data page.
